The world is your trading floor

ARIA - the mobile technology that lets you work from home or anywhere

Contents

Need to voice trade remotely?

Trade with confidence, wherever you are

In a world that's constantly on the go, you need the flexibility to work remotely, without compromising on security. But how do you access the specialist technology you need, from home?

ARIA is an innovative cloud-based virtual trading solution that allows you to voice trade from anywhere. As long as you've got a connection to your network, you can rely on the same secure mobile technology you use in the office.

Get access to all your direct broker lines and share lines with your teams. Meet all security and compliance regulations, with full end-to-end call encryption and the option to voice record. No hassle. No complicated PC set up. Just point, click and talk.

It's smart. It's straightforward. It's secure. So, wherever you are, it's business as usual.

It's smart. It's straightforward. It's secure.

With ARIA it's business as usual

When you're trading remotely, you need a solution that is smart, straightforward and secure. ARIA ticks all the boxes.

It's smart

Be ready to respond to unexpected change. With ARIA, voice trading becomes mobile. So no matter the circumstances, you can continue trading from anywhere, on any device.

It's straightforward

Designed specifically for remote trading, ARIA gives you the tools you need, right there on your browser. It's easy for traders to use and easy for organisations to roll out, with no complicated PC setup.

It's secure

Flexibility needn't come at the cost of security. ARIA is fully compliant and makes trading from home as secure as trading from the office.

Why ARIA?

Trade anywhere with a connection

With ARIA, you can voice trade from anywhere. As long as you've got a connection to your network, you can rely on our technology to support you.

Stress-free remote access

Access a global directory, trading lines and broker lines, and place calls between two handsets. And, if you're working off fewer screens than usual, ARIA will adapt to give you the best possible experience.

End-to-end encryption

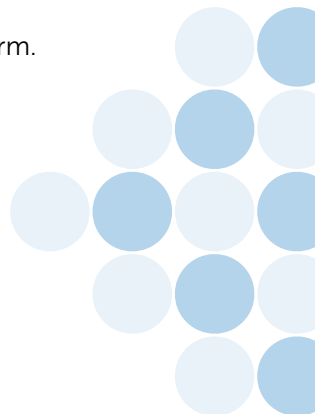

ARIA protects your business with end-to-end encryption. Calls can also be voice recorded and stored in line with industry compliance regulations.

Scale up, or down

Need to scale up? No problem – ARIA has been designed to accommodate up to 10,000 users.

Centralised management system

With ARIA's iCentralised Management System, you can manage thousands of users on one easy-to-use platform.

Straightforward set up with full expert support

New to Speakerbus?

ARIA is straightforward to set up and install. There's no complicated PC set up for your traders. Just point, click, and talk. Whether you opt for CloudBase or CloudConnect, we'll work with your network team to ensure you're up and running, safely and securely, in no time at all.

We'll install the core component software on physical servers or virtual machines, before installing gateways to connect to your existing systems. Next, we'll configure your profile layouts, configure and test your networks and train your users.

Already a customer?

If you've already got a Speakerbus Intercom or iTurret, ARIA works as an overlay with additional components.

We'll carry out version checks on your systems to ensure you're supported and ready to go, before installing the core ARIA software, adding the required components to your physical servers or virtual machines.

We make every connection worth more

We're global experts in our field. Our customers rely on us to help them reach their goals. We understand what your organisation needs, because we've been doing what we do for more than 35 years. Our portfolio connects over 250 clients and 50,000 end users across more than 60 countries worldwide.

We've got your back

We'll work with your network team to ensure everything is working as it should.

We build long term alliances

We don't just sell you a product or service, and then leave you to get on with it. We're committed to building long-lasting and rewarding business relationships that work for everyone.

We're proud of what we do

We bring solutions adapted to your fast-changing working environment. We're agile innovators, and our people work hard to give you the best technology. Our technology.
